PERFECT FOR:

- SCHOOLS
- PARKS
- COMMERCIAL
- GOLF COURSES
- MUNICIPAL
- AIRPORTS
- SPORTS AND
RECREATION FIELDS

Tough Enough to Knock Down Any Turf With the Accuracy Demanded by the World's Finest Golf Courses

Lastec's Model 120ER is the first PTO-driven Articulator to be designed specifically for heavy mowing applications while still offering the cut quality that has made Lastec famous. The 120ER utilizes deep-pan designs and components that make it capable of standing up to the rigors of the toughest mowing challenges. It features larger diameter 11" flat-proof gauge wheels that can handle the roughest terrain. The outer decks can be hydraulically folded to a 96" width and raised for high speed transport from the seat of the tractor. The ten foot cutting width is made up of five 25" articulating rotary decks that follow the contours of the terrain to deliver the cutting accuracy of a small push mower. The decks feature a rear discharge system that fans the grass across the cutting path for a beautiful finished cut. The Model 120ER features patented deck drives that are lighter weight and more efficient than other alternatives to allow the mower to be powered by a lower horsepower tractor that can save you half the fuel required to cut with other options. Deck heights can easily be changed in the field and can cut from 1 1/2" to 4 3/4" tall.
